Courtney Chivers

My name is Courtney Chivers and I have been a patient at Arkansas Dental Health and TMJ Therapy Center for two years. I was having a root canal and my dentist suggested that I be tested for TMJ disorder because of the problems I was having. She referred me to a physician who performed a test and confirmed I was suffering from TMJ disorder. I was given several different oral appliances but my pain was not relieved. I would awaken in the mornings with really bad pain from grinding my teeth and I continued to have ringing in my ears. I had a friend who was having therapy for her TMJ problems at Dr. Beaver's office and she suggested I make an appointment for an evaluation at Arkansas Dental Health and TMJ Therapy Center. I came in for a second opinion and was put into braces two weeks later. I am an audiologist and talk all day long with patients which use to cause me a great deal of pain due to my TMJ disorder. I have no pain like I previously suffered and would advise anyone thinking they have the disorder to call and make an appointment for an evaluation.
