LINDA DOLLAR

At the time I decided to make an appointment with Arkansas Dental Health and TMJ Therapy Center I was having a lot of the symptoms typically associated with TMJ disorder. I was in a great deal of pain and I was having migraines and muscle spasms. The pain on the right side of my face was so severe that I could not apply any pressure at all to the area. Dr. Beavers explained his approach to correcting my TMJ problems and I must admit I thought his treatment a little unorthodox at first. I was quite skeptical as to whether his approach would help my problem but decided to try the treatment.

Dr. Beavers and his staff assured me that if I did what they suggested, their non-surgical method of treatment would alleviate my pain and correct my problem. I began my therapy four months ago and I can say I am pleasantly surprised with the results to date. I am confident that if I continue my therapy I will be totally free of any TMJ problems in the future.
