**MISTY PAYTE**

My name is Misty Payte and I am twenty-eight years old. I have been under the care of Arkansas Dental Health and TMJ Therapy Center for seven months. I was having symptoms of vertigo, tinnitus, jaw popping, numbness in my hands and feet and headaches on a daily basis. I had been to three different physicians, all of whom ran different tests and did blood work on me. They could not find anything wrong nor could they explain why I had these symptoms. Then I went to a physician who told me I had Meniere's disease and possibly Fibromyalgia. He told me that there was nothing he could do for me and that I would have to just learn to live with the symptoms. About this time, in my search for help, I found Dr. Sam Beavers and Arkansas Dental Health and TMJ Therapy Center. He said he could help me so after discussion with my husband we decided I should begin treatment.

Dr. Beavers also suggested I see a chiropractor for my shoulder tightness, headaches and numbness. Hopefully I am on the road to getting my life back, my jaw popping is gone and the tinnitus, vertigo and headaches only come and go.
