Dewey Robinson

Best Tire Company, Founder

My name is Dewey Robinson. I suffered with headaches for two years believing they were due to my sinuses. I visited an ENT and received no satisfaction after using nasal sprays and various other treatments. I went to my primary care physician who gave me a shot and more nasal spray still to experience the pain. By this time I noticed that I was having pain in my neck, shoulders and head, complicated by dizziness. I had seen Dr. Beavers articles in the Democrat Gazette and it appeared he had the answers to TMJ problems. I have known him for a long time and decided to call and see if he thought he could help me. He instructed me to come on in and get an evaluation. After reviewing my x-rays he showed me that my problem was TMJ disorder. He fitted me with an emergency splint to wear for a couple of days and then impressions were made for my permanent splint. After wearing the splint for three days I noticed a change in the way I felt and after one week of wearing the splint my pain was gone. I have been pain free for approximately one year. I am tickled to death with what Arkansas Dental Health and TMJ Therapy Center has done for me and I would recommend them to anyone who suspicions they are having TMJ symptoms.
